

2016 Aptoide Summer Internship - Weekly Report 2 [July 17 – July 21]

Project: Aptoide Ad Monitor

Trainee: Dária Baikova

Mentors: Frederico Santinho & Diogo Carvalho

Completed tasks during the week:

- Research on Android basics:
 - Activity life cycle
 - Fragments
 - Android intent
 - Android layouts & views
- Research & testing Android components to be used:
 - *ListView* & *RecyclerView*
 - “Chat head-like” floating notification widget
 - Android services
 - Window Manager
- Aptoide source code analysis

Goals for next week:

- Begin implementation:
 - Start creating the user interface
 - Define entry points in the Aptoide source-code
