

## 2016 Aptoide Summer Internship - Weekly Report 6 [August 16 – August 19]

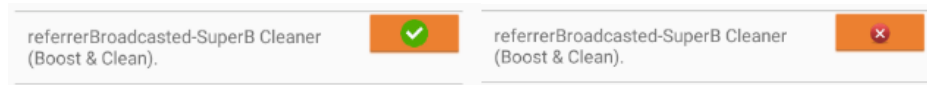

**Project:** Aptoide Ad Monitor

**Trainee:** Dária Baikova

**Mentors:** Frederico Santinho & Diogo Carvalho

### Completed tasks during the week:

- Working on the chat head notifications:
  - Creating a “drag and drop” facebook-like mechanism to close the chat head (dragging the chat head to a floating cross icon);
- Finishing the conversion functionality:
  - Testing
  - Parsing the web service answer
  - Implementing the mechanism to show the web service answer in the interface: If a conversion occurred a check icon will be shown on the “test conversion” button otherwise a cross icon will be shown (see images below);

- Start working on the app view:
  - Analyzing Aptoide xml files
  - Testing & applying different themes, styles & colors
  - Customizing the RecyclerViews (Line Separators & Background);
- Refactoring & Reorganizing code
- Fixing bugs;

### Goals for next week:

- Finish the user interface- Applying possible changes
- Final touches on the chat head notifications
- Refactor code & fixing bugs
- Testing;
