

Weekly status report
Week 4

Intern Name: Eduardo Vidal

Project: Static code quality control audit

Report Period: 31/07/2017 – 04/08/2017

Project Advisor: Luís Lopes

Work done:

- Research and work with the Spring MVC to build the server front-end;
- Built an early stage of the web front-end to manage Git repositories;
- Developed an early version of the configuration file based on XML;

Work not done:

- The back-end is still to be built and tested;

Work to be done next week:

- Research on the Jenkins-Docker integration to develop the Git aggregation and build component;
- Develop a working version of the Git management and build component, based on scripts;
